

BANTAM[®]

HIGH PERFORMANCE MANUALLY-OPERATED DOOR

The Economical, Break-Away Dock Door Alternative

The Bantam roll door is an economical fabric door alternative to high maintenance overhead dock doors. With the same crisp lines and fabric selection as our popular PredaDoor[®], it accommodates most dock applications. The Bantam door is ideal for interior or exterior applications with low to moderate traffic.

With manual operation standard via a pull-chain hoist, the Bantam can also be motorized for more convenient, and more automatic, opening and closing speeds, if desired.

Takes a Hit - Quick-Set[™], Break-Away[™] tabs allow bottom bar to be reset in just seconds, without tools, virtually eliminating downtime and repair costs.

Simple Operation - Chain hoist and speed governor make for easy manual door operation.

Minimal Space - Only 6-1/4 inches of side clearance and 3-3/4 inches of side column projection required.

Wind Resistance - Integral panel connecting ribs allows quick, inexpensive replacement of all panel sections and provides resistance to wind and negative pressure.

Visibility - 17 inch by 17 inch replaceable window is standard. Optional full-width vision panel is available.

HIGH PERFORMANCE MANUALLY-OPERATED DOOR

Model Name

- Rytec® Bantam® Door

Size and Dimensions

- Up to 10' W x 10' H
- 20" headroom above lintel
